Travis McQuinn  
Tech Monster PC Repair

To Whom It May Concern:

We were introduced to Travis through a mutual friend. Since starting to work with Travis he has totally redesigned our website and made it easier to navigate and better reflect what we do as a company. Travis has also taken over all procurement of technology for our company, saving us time and money. He has set up a security system for us with eight cameras and a DVR system that is second to none and the price was shockingly low. He has designed and implemented an order fulfillment system on our smart phones for managing all aspects of our operations, thus allowing us to be more green and reduce our paper consumption. All in all Travis is our go to guy and we reference him as our IT department. I can call Travis at any time and throw any problem I have at him and he comes up with solutions! I would highly recommend him to anyone looking for someone to ease the headaches that come with technology. It is great when it works and when it doesn't I call Travis and you should too!

Sincerely,

John Rennels – President
